

Special Invitation to Celebration Event Keynote Luncheons (RSVP within)

Lon Porter <porterl@wabash.edu>

Tue 2020-01-14 7:52 PM

To: everyone_list <everyone_list@wabash.edu>

Dear Wabash Community,

Since 2001, the Wabash community has reserved a Friday afternoon in late January to spotlight the impressive work of Wabash students at the *Celebration of Student Research, Scholarship, and Creative Work*. By vote of the faculty, afternoon classes are canceled on this day so that all members of the community may attend. ***Continuing this tradition, the 20th Annual Celebration of Student Research, Scholarship, and Creative Work will take place on the afternoon of Friday, January 24, 2020.*** In honor of this year's special 20th Celebration event, the program will start with three paired, student-alumni keynote addresses.

On behalf of the Celebration planning committee, you are invited to attend one of these three exciting keynote programs during the lunch hour on 1/24. A 15-minute student presentation will be followed by a 20-minute alumni address. Student presenters were selected via competitive on-campus auditions and will share the results of research projects. The alumni keynotes will share reminiscences of research/creative work completed at Wabash and how those experiences impacted personal or career development following graduation.

For the past 19 years, the Celebration event recognizes, in a proud and public way, the creative accomplishments of Wabash students. We celebrate not only the particular achievements of individual students, but also a deeply embedded ethos of the College. Close collaboration between Wabash students and mentors across the College is a hallmark of our culture that makes a difference for our students. Please consider helping to make the 20th Celebration event even more special by attending one of these exciting keynote programs.

Lunch will be available at all keynote presentations for those that RSVP via this link: <https://wabash1832.wufoo.com/forms/celebration-keynote-luncheons/>

Sincerely,

Dr. Lon Porter, Professor of Chemistry and Chair of the Student Research Celebration Planning Committee

20th Student Celebration Event Keynote Presentations

Friday, January 24th, 12:10 pm

Student Keynote Speakers (15 min): *Student Research*

Aaron Webb '20

Managed Care's Threat
to Patient Autonomy
